EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to an applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The following changes have been made in a subject of the application to place the claims in a condition for allowance:

Claim

In claim 1:

- Line 7, inserted --a-- before "part".
- Line 10, inserted --to-- before "decrease".

In claim 18:

- Line 7, inserted --a-- before "part".
- Line 10, inserted --to-- before "decrease".

The above change was made to place the application in better condition for allowance.

REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance:

Claims 1-17 are allowed because none of the prior art references of record teaches an ink flow control device for a printer having at least one print head comprising a diaphragm that is carried by a main body and defining at least part of a pressure receiving chamber on one side of the diaphragm that forms a part of the ink flow passage and a reference chamber on the other side of the diaphragm and a valve that includes a valve seat with a bore defining a portion of the ink flow passage, a valve head movable relative to and selectively engageable with the valve seat

Art Unit: 2861

to at least substantially restrict ink flow through the bore when the valve head is engaged with the valve seat and to permit ink flow through the bore when the valve head is not engaged with the valve seat, the valve head being moved relative to the valve seat by movement of the diaphragm to control ink flow through the ink flow passage at least in part by the movement of the diaphragm in the combination as claimed.

Claims 18 is allowed because none of the prior art references of record teaches an ink flow control device for a printer having at least one print head comprising a diaphragm that is carried by a main body and defining at least part of a pressure receiving chamber on one side of the diaphragm that forms a part of the ink flow passage and a reference chamber on the other side of the diaphragm and a valve that controls the flow of ink through the ink flow passage to the print head and operably connected to the diaphragm for movement by the diaphragm to permit ink flow to the print head when the print head is operating to discharge ink for printing and to at least substantially restrict ink flow when the print head is not printing in response to changes in pressure produced by operation of the print head and applied through the ink to the diaphragm in the combination as claimed.

CONCLUSION

Any comments considered necessarily by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
